ValkPro+

ValkPro+ East West

### Technical specifications

- Low ballast flat roof system with fixed tilt angle of 10°.
- Pitch rows of 1,5 m (south) en 2,3 m (east west).
- Shielded system with wind deflectors.
- Suitable for panels with the following dimensions:  
width from 977 to 1070 mm, length from 1559 to 1675 mm and from 1952 to 2000 mm.  
The east west system is suitable for any length of panel.

### ValkPro+ vs. competitive systems

- Metal connectors, no plastic. Therefore stronger and simple to ground.
- Also applicable to high roofs (+ 12 m).
- Applicable to roofs with a slope to 5°. At > 5°, the system should be fixed to the roof.
- Universal integrated panel clamps (28-50 mm frame height).
- Can catch inaccuracies in placement 'A-frames'.
- Also suitable for gravel roofs and fixed mounting to roofs and steel structures.
- Elevated mounting on roof for guaranteed drainage.
- Surprisingly low price.

### Additional features

- Minimum ballast and roof load due to wind deflectors and coupled rows.
- Mounting is faster than ever, very limited number of screw joints.
- Maximum logistical simplicity, very limited number of articles and dimensions.
- South and east west configuration.
- Prepared for cables and cable trays.
- Conforms fully to regulations.
- Easily and fully demountable.
- Domestic and commercial projects.

### Gross indicative price list south

ValkPro+   gross indicative price list				
Number of panels per row	5	10	15	18
Number of rows	5	10	15	40
Number of panels	25	100	225	720
Gross indicative price LOW wind load (per Wp)	£ 0,138	£ 0,122	£ 0,117	£ 0,115
Gross indicative price HIGH wind load (per Wp)	£ 0,169	£ 0,139	£ 0,129	£ 0,122
• PVC roofs 2-4% charge				
• Price based on standard ca. L=1650 mm, 250 Wp panel and depending on exchange rate.				

### Gross indicative price list east west
