Setup

The tado° Smart Thermostat replaces the existing thermostat in your living room. For wireless thermostats or boilers without a room thermostat, you will also need the tado° Extension Kit.

Smart Thermostat
is installed in your living room. It replaces the existing thermostat.

Extension Kit
to install tado° wirelessly or for boilers without a room thermostat, you will also need the Extension Kit. It connects directly to the heating system.

Works with almost all heating systems

It doesn't matter which type of heating you have – the tado° Smart Thermostat works with almost all systems and major manufacturers: combi, system and heat-only boilers, conventional and condensing boilers, hydronic and electric underfloor systems and heat pumps.

Requirements:
- Smartphone
- Internet
- Central heating system

If you have any questions on compatibility or need help, give us a call on ☎ 020 35144881

Time for smarter heating

Replace your old thermostat with the tado° Smart Thermostat and experience a new level of comfort and control while saving energy and cost.

Saves money
Reduce your heating bill by up to 31% and save over £200 a year.

Makes life easier
tado° controls your heating automatically so you don't have to.

More comfort
Always return to a warm and cosy home while saving when you're away.

Simple
Simple to set up, intuitive to use and easy access from anywhere.

Transparent
Clear oversight of your energy usage so you can see your savings.

The mobile App

With the smartphone app tado° can automatically adapt the heating to where you are, reduce the temperature when you leave and heat before you arrive.

- Geolocation-based heating control
- Weather forecasts integration
- Insightful reports and heating activity at a glance
- Building characteristics integration
- Control from anywhere
- Hot water control
- Heating system alerts
