

Why?

The Smart Thermostat that uses your phone's location to cut your energy bill

Saves Energy

Saves up to 31% on your heating bill: that's a whopping £ 1000 in just five years. tado° pays for itself in less than a year.

Makes Your Life Easier

No turning your heating up or down, no schedules, no teaching. tado° does all the work for you, automatically.

More Comfort

tado° makes sure that it's always warm when you get home and that you have hot water when you need it.

More Transparency

See how much you save every day, the temperature at home and when your heating is turned on.

How?

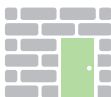

Geolocation

tado° automatically adjusts the temperature based on the resident's location: lower when everybody is away, warm when you arrive at home.

Weather Forecast

tado° includes local weather forecasts in real time to adapt your heating, e.g. heat less on a sunny day.

Building Characteristics

tado° gets to know your home's unique heating characteristics and learns the most efficient way to heat up your home.

Hot Water Control

tado° controls your hot water, too. Set a schedule or let it heat up automatically when somebody is home.
